On June 21, **Knockdown Center** will present a full-spectrum look at the automobile as our nation's long standing symbol of manifest destiny and superfluous ingenuity.

Set amidst three acres of parking lot, gallery, blackbox, and warehouse, **M-WOW** will take this undeniable American obsession to its illogical conclusion featuring an impressive array of high-end custom and collectible cars in conversation with automobile-inspired visual art. Complementing the landscape will be the sights, sounds and smells typically associated with a state fair including: fried things, metal/psych rock bands, burnt rubber, sledge hammers hitting steel, charcoal grills, pirate radio and more! Don't miss this opportunity to kick off the summer right!

Participating artists include...
